SUMMARY

Full Stack (Software Testing) Test Automation Engineer with 15+ years in **UI, API, mobile, and middleware testing** within Agile DevSecOps environments. Expertise in automation with **SoapUI, REST Assured, Selenium, and Cypress**, integrated via GitLab CI/CD. Skilled in performance testing, SQL data validation, and leveraging cloud platforms (**AWS, Azure**) to ensure secure, efficient software delivery. Recognized for strong collaboration and leadership.

TECHNICAL SKILLS

- **Project Management & Testing Tools**: SAFe, Agile-Scrum, Cloud Technologies Azure DevOps (ADO), JIRA, Xray, ALM, Rally, Zephyr, Adaptavist, SQL, Oracle, GraphQL, Swagger, Confluence, POSTMAN, Splunk, New Relic, SonarQube & CheckMarx, BigData, Figma, JSON, HTML, Immuta, AWS MySQL, PostgreSQL, Snowflake, DBeaver, PGAdmin, JMeter & Locust (Load & Stress test), Docker, WebRTC, FIX, REST, SauceLabe, BrowserStack, LamdaTest, Lighthouse, WAVE, JAWS, NVDA, PDF, ANDI, Wireshark
- **Automation Tools**: Selenium, Gauge, CypressIO, Playwright, TestCafe, SpecFlow, RestSharp, CodedUI, WebDriverIO, Protractor, XCode, Appium, XCUITest, NightWatch, RestAssured, Cucumber, Gherkin, SuperTest, Katalon Studio, SauceLabe, BrowserStack, LamdaTest, Frisby, PyTest, ReadyAPI, Jupiter notebook, Maven, Gradle, npm, Git, GitHub, Bitbucket, Eclipse Intellij, SVN, Unix/Linux, CircleCI, Jenkins, AWS (IAM, EC2, DynamoDB, Cloud Watch), Azure, Azure Service bus, EventHub (Event-driven microservices), Kafka, GraphQL, Axe, Pa11y, PowerBI, Tableau, SOAPUI & REST API, TMW, Tosca, Generative AI (ChatGPT), Prompt Engineering, AccelQ, TestGrid, Mabl, Subject7
- **CI/CD Integration**: Skilled in integrating automated testing into CI/CD integration pipelines to enhance software delivery.
- **Industry Experience**: Analytics (Analytical Skills), Cyber Security, Information Services, Information Technology, Project Manage ment, Security

WORK EXPERIENCE

Global iTech Solutions (GITS) **April 2026 - Present**
Test Lead, QA Architecht (SDET) *Work from home (Home Office)*
Manage QE and automation strategy for enterprise clients (e.g., HD Supply-Internal Inventory Management Microservice) and Centene (Contract Center), collaborating with business and engineering teams to enhance end-to-end testing processes, implement quality standards, and drive innovation in test automation.

- Leading end-to-end quality engineering for clients (e.g., HD Supply), collaborating with business and engineering teams to deliver precise, high-quality products.
- Leading end-to-end quality engineering for enterprise clients, partnering with business and engineering teams to deliver reliable, scalable, and high-quality software solutions.
- Driving QE strategy and test modernization through automation standards, 508 accessibility compliance, Agile 3-Amigos practices, and real-time QA metrics and dashboards.
- Designing, building, and maintaining automation frameworks across UI, API, middleware, accessibility, and mobile testing using Playwright, Cypress, Appium, ReadyAPI, GraphQL, and AI-powered testing tools.
- Leveraging experience with existing Tricentis Tosca suites to support migration to Playwright with TypeScript, improving automation speed, stability, maintainability, and scalability.
- Leading automation transformation by migrating legacy test coverage to Playwright with TypeScript, enabling faster execution, stronger regression coverage, and improved in-sprint automation.
- Leading automation transformation by migrating legacy test coverage from Katalon Studio to Playwright with TypeScript, enabling faster execution, stronger regression coverage, and improved in-sprint automation; continuously worked in Katalon Studio during the transition and now continue driving automation development in Playwright with TypeScript.
- Managing & Preforming SAP Automation and end-to-end testing across SAP GUI, SAP Fiori, SAP ERP & Apriso Web App, SAP EECC, and S/4HANA, validating critical business process across FICO, MM, SD, and HCM Modules leveraging Tricentis Suite (Tosca, qTest, LiveCompare, NeoLoad, Data Integrity)
- Design,ing Developing and scaling enterprise regression automation suites for complex applications, applying expertise in Tosca and Playwright to support sustainable test strategy and smooth framework migration.
- Implementing API automation frameworks from scratch using Postman and Newman, integrating them with GitHub Actions CI/CD pipelines for nightly execution.
- Developing mobile automation frameworks from scratch using Appium for iOS and Android with WebdriverIO, integrating with LambdaTest for emulator and real-device coverage and GitHub Actions for CI execution.

- Creating and executing performance testing solutions for UI, API, and database load testing using BlazeMeter and JMeter, with continuous tuning based on sprint and project needs.
- Designing and maintaining CI/CD-integrated automation solutions across GitHub Actions and AWS services including S3, DynamoDB, CloudWatch, Amazon Connect, and Genesys.
- Supporting performance, security, and GraphQL modernization initiatives, including optimization of system behavior under load and migration of critical endpoints.
- Conducting proofs of concept across Robot Framework, Katalon, AccelQ, and Tosca to evaluate tools, improve automation efficiency, and align testing solutions with business goals.
- Hands-on expertise in UI, API, Middleware, Accessibility, and Mobile Automation using CypressIO, Playwright, Selenium, Appium, TestCafe, ReadyAPI, GraphQL, and AI-powered testing (Claude Code, ChatGPT, CodeGPT, Copilot, Gemini).
- Mentoring QA engineers and cross-functional teams in automation best practices, accessibility, Performance Testing, CI/CD, integration, and AI-driven testing, strengthening quality culture and delivery maturity.

FDIC (via VivSoft) **Oct 2025 – April 2026**
Lead, Test Automation Enginner *Work from home (Home Office)*
Test Automation Engineer for federal modernization programs (FDIC), in Agile environment focusing on CI/CD-driven quality engineering, UI automation (Playwright TypeScript), performance/load testing, and DevSecOps (DAST/SAST) to enhance software quality across unit, integration, and regression phases.

- Developed and maintained automated **API functional and regression tests using Java and Rest Assured**, validating REST services, response payloads, status codes, business rules, and error handling.
- Built scalable **UI automation frameworks using Java, Selenium, and Playwright**, supporting reusable components, cross-browser testing, end-to-end validation, and reliable regression execution.
- Applied strong **Java programming, debugging, and troubleshooting skills using IntelliJ IDEA, Maven, Git, and CI/CD pipelines t**o develop and maintain enterprise automation solutions.
- Standardized automation best practices across multiple FDIC projects, improving framework consistency, test maintainability, execution reliability, and reusable automation design.
- Performed comprehensive **API, UI, functional, regression, defect analysis, and test-result reporting**, supporting release-readiness and quality-gate decisions.
- Implemented additional enterprise automation using **Tricentis Tosca and Subject7** for repeatable functional and regression testing across complex applications.
- Integrated automated testing into **GitHub Actions/YAML CI/CD pipelines**, including environment-based executions, automated regression suites, reporting, and quality gates.
- Implemented **performance, load, and stress testing using JMeter and Azure Load Testing**, identifying application bottlenecks and supporting performance optimization.
- Supported **DevSecOps quality practices by incorporating SAST and DAST security testing** into delivery pipelines to improve security and compliance.
- Collaborated within **Agile teams** with developers, product owners, business analysts, DevSecOps engineers, stakeholders, and manual QA teams to define test strategy, troubleshoot defects, and improve release confidence.
- Improved automation stability by reducing flaky tests, optimizing execution, standardizing reporting, and continuously enhancing reusable test utilities and framework components.
- Leveraged **GitHub Copilot** to accelerate automation development, code refactoring, troubleshooting, and reusable component creation while maintaining established coding and QA standards.

U.S. Department of Agriculture (Agile Defense via Koniag) **Oct 2024 – Aug 2025**
Tech Lead, Software Development Engineer in Test (SDET) *Work from home (Home Office)*
Enhanced end-to-end testing processes in an Agile and DevSecOps environment, ensuring precise product delivery for the NRSC (NOIS-Kodiak Project) by incorporating both manual and automation testing practices.

- Standardized QA practices globally, integrating accessibility 508 Compliance Testing along with performance and regression testing, aligning with industry best practices.
- Established automation coding standards and agile-scrum cross-functional processes using **Selenium, AccelQ, and Java, while inte- grating API testing automation with ReadyAPI and POSTMAN to ensure robust SOAP and REST API** validations.
- Collaborated with business, engineering, and operations teams to evaluate and improve software development testing lifecycles, supporting unit, integration, performance, and security testing.
- Led **DevOps integration efforts using Bitbucket, AWS, and Jenkins to streamline CI/CD pipelines**, enhancing automation delivery and overall system reliability.
- Mentored junior engineers in **UI and API automation testing**, promoting a culture of continuous improvement and adherence to

test automation best practices.

Global Tech Solutions (GITS) **Dec 2023 - Oct 2024**
Tech Lead, Quality Assurance (SDET) *8905 202nd Street, Queens, NY*
Drove end-to-end test automation in an Agile environment for major clients such as HD Supply, focusing on API testing and enhanced software quality across unit, integration, and regression phases.

- Implemented and standardized QA practices globally, combining manual, automated, security, and performance testing to meet stringent quality standards and ensure reliability.
- Established automation coding standards and guided cross-functional agile teams in leveraging tools like CypressIO, TestCafe, and Playwright for robust UI, API, and middleware testing.
- Optimized processes for API testing by migrating from REST to GraphQL endpoints using ReadyAPI, reinforcing a secure and efficient application lifecycle.
- Integrated testing within CI/CD pipelines, emphasizing best practices in DevOps using modern tools and methodologies, and ensuring continuous delivery of high-quality software.
- Pioneered the adoption of comprehensive testing strategies, including mobile and performance testing, using Appium and JMeter, contributing to enhanced test coverage and reliability.

Raytheon Technologies (RTX) **Oct 2018 - Nov 2023**
Sr. Mgr. Software Dev *55 Water Street, Brooklyn, NY*

- Oversaw leadership and mentorship within the Enterprise Digital Accelerators (EDX), implementing Manual testing & Automation testing best practices, ADO Scorecard, and establishing frameworks.
- Collaborated with various teams to continuously assess and enhance end-to-end software development processes, tools, and methodologies.
- Developed and implemented Manual testing, accessibility testing, automation testing, and performance testing strategies across the Enterprise Digital Accelerators (EDX).
- Identified and acted upon opportunities for innovation, simplification, and proactive technical debt reduction in the testing process.
- Managed the migration from NightwatchJS to Protractor to CypressIO to Playwright and RestAPI, GraphQL, streamlining processes and enhancing efficiency.
- Led the creation of boilerplate architectures for UI testing, Middleware testing (Event-driven microservices), and API testing frameworks, leveraging multiple programming languages (Cucumber, Java, C#, Python, JS) and cloud-based services leveraging SauceLabs, BrowserStack, LamdaTest, and leveraging AWS, ADO, Jenkins, SonarQube leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Mentored junior to mid-level team members in object-oriented programming principles, automation testing frameworks, and DevOps Practices Docker/containerization for test automation, ensuring standardized practices and knowledge sharing.
- Hands-on leveraging Cloud Technologies, creating pull requests leveraging Git, GitHub, SVN, ADO, Bitbucket, GitLab, and Unix/Linux basic commands to accomplish daily automation tasks.

Bank of America < (Mitchell Martin Inc.) **Jun 2018 - Oct 2018**
Sr. Quality Assurance Engineer *222Broadway, Manhattan, NY*

- Took the initiative to Enhance the agile Scrum 3 Amigo process & documentation.
- Automated mobile testing (iOS, Android) and Web microservice application leveraging Cucumber, Java, Selenium, XCUITest, Android Studio, TestNG, Maven, AXE, SoapUI & Restful API, GraphQL, Allure Report from scratch & integrated with CI/CD and leveraging cloud-hosted service ADO, AWS, Jenkins, SonarQube and
- Cloud Technologies SauceLabe leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Conducted thorough testing of ETL processes and databases using Python and PySpark, ensuring data integrity accuracy, and reliability in data transformations and migrations.
- Performed manual accessibility testing on Web, and PDF leveraging ANDI, JAWS, NVDA, AXE, and WAVE, and automated them leveraging AXE & PA11Y.
- Automated internal web application leveraging CypressIO, JS, Allure Report, leveraging POM, Data- Driven concept, etc., and integrated with Circle CI, Docker Container, and AWS (S3) leveraging IDE VS Code, PyCharm, Eclipse & Intellij.

HEARST **Oct 2017 - Apr 2018**
Sr. DevOps/Automation Engineer *300 W. 57th Street, Manhattan, NY*

- Automated multiple applications leveraging existing NightwatchJS & Protractor framework, optimized leveraging best practice and standards dry and kiss principle.
- Migrated NightwatchJS & Protractor framework to CypressIO framework leveraging, Page Object Model, Data & Keyword-driven concept, SuperTest (Restful API), GraphQL, & Integrated with CI/CD integration pipeline leveraging AWS, ADO, Jenkins, SonarQube leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Conducted thorough testing of ETL processes and databases using Python and PySpark, ensuring data integrity, accuracy, and reliability in data transformations and migrations.
- Tested Manually on Web, PDF leveraging ANDI, JAWS, NVDA, AXE, WAVE, and automating them leveraging AXE & PA11Y.
- Utilize Docker for test automation to ensure consistent testing environments, manage dependencies effectively, and streamline continuous integration processes for efficient testing workflows.
- Conducted Manual Testing on RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them

leveraging RestAssured & SuperTest.
- Hands-on creating pull requests leveraging Git, GitHub, SVN, ADO, Bitbucket, GitLab, and Unix/Linux basic commands to accomplish daily automation tasks.

JCDecaux **Apr 2017 - Oct 2017**
Lead, Software Development Engineer in Test *350 5th Avenue, Manhattan, NY*
- Automated both applications leveraging NightwatchJS & Protractor from scratch & integrated with CI/CD.
- Automated API's endpoint leveraging RestAssured SuperTest (Restful API) & GraphQL API endpoint from scratch & integrated with CI/CD AWS, ADO Pipeline, Jenkins, SonarQube leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Performed manual accessibility testing on web and PDF files using assistive technologies leveraging JAWS and NVDA, along with tools leveraging ANDI, AXE, WAVE, and PA11Y.
- Automated accessibility testing using AXE and PA11Y to streamline and enhance the testing process for web applications and documents.
- Utilize Docker for test automation to ensure consistent testing environments, manage dependencies effectively, and streamline continuous integration processes for efficient testing workflows.
- Conducted Manual Testing on RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them leveraging RestAssured & SuperTest.
- Hands-on creating pull requests leveraging Git, GitHub, SVN, ADO, Bitbucket, GitLab, and Unix/Linux basic commands to accomplish daily automation tasks.

Cloud9 Technologies **Jul 2016 - Mar 2017**
Software Development Engineer in Test *565 5th Avenue, Manhattan, NY*
- Automated desktop c9 application leveraging C#.Net, NUnit from the scratch & integrated with CI/CD.
- Automated web c9 application (user management and support) leveraging NightwatchJS, Protractor from scratch, SuperTest (Restful API) integrated with CI/CD integration with Cloud Technologies AWS, ADO, Jenkins, and SonarQube leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Performed manual accessibility testing on web and PDF files using assistive technologies leveraging ANDI, JAWS, and NVDA, along with tools leveraging AXE, WAVE, and PA11Y.
- Automated accessibility testing using AXE and PA11Y to streamline and enhance the testing process for web applications and documents.
- Utilize Docker for test automation to ensure consistent testing environments, manage dependencies effectively, and streamline continuous integration processes for efficient testing workflows.
- Conducted Manual Testing on RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them leveraging C#. NUnit & SuperTest.
- Hands-on creating pull requests leveraging Git, GitHub, SVN, ADO, Bitbucket, GitLab, and Unix/Linux basic commands to accomplish daily automation tasks.

Wells Fargo < (Tek System) **Nov 2015 - Jul 2016**
Lead, Application System Engineer 6 (ASE6) *2700 S Price Rd, Chandler, AZ*
- Enhanced (Optimized) Selenium, Cucumber, and Java TestNG existing framework, by applying best practices & standards.
- Automated contact center Master call flow with Empirix & Cyara leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Took initiative on the Edge to CIV STM project & developed a new framework RestAssured from scratch, POSTMAN, Swagger, AccelQ, ReadyAPI, SoapUI & Restful (API), integrated with CI/CD integration Cloud Technologies AWS, ADO, Jenkins, SonarQube and leveraging cloud-hosted service SauceLabe.
- Manually tested RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them leveraging RestAssured & SuperTest.
- Performed manual accessibility testing on web and PDF files using assistive technologies leveraging ANDI, JAWS, and NVDA, along with tools leveraging AXE, WAVE, and PA11Y.
- Automated accessibility testing using AXE and PA11Y to streamline and enhance the testing process for web applications and documents.

DSHS Children Administration (CATs) **Mar 2015 - Nov 2015**
Information Technology System 3 (ITS3) *14th Ave SE, Olympia, WA*
- Automated end-to-end case management and history-based CAT's application (Web and Desktop) leveraging Java, C#.Net, Selenium, Cucumber, XCUITest, Android Studio, CodedUI, JMeter, SQL & integrated with CI/CD integration Cloud Technologies ADO,
- Jenkins, SonarQube leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Manually tested RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them leveraging C# NUnit.
- Performed manual accessibility testing on web and PDF files using assistive technologies leveraging ANDI, JAWS, and NVDA, along with tools leveraging AXE, WAVE, and PA11Y.
- Automated accessibility testing using AXE and PA11Y to streamline and enhance the testing process for web applications and documents.

AT&T < (Pyramid Consulting Inc.) **Jun 2014 - Mar 2015**
Sr. Test Engineer *20205 North Creek Pkwy, Bothell, WA*

- Developed a performance framework leveraging Keynote & JMeter and was monitoring using Dynatrace.
- I was designing (detailed design), estimated, developed, and performed code reviews, created test plans, and test cases, and implemented test automation leveraging Java, Cucumber, Selenium (API), TestNG, and Maven leveraging IDE VS Code, PyCharm, Eclipse & Intellij.
- Tested Manually on Web, PDF leveraging ANDI, JAWS, NVDA, AXE, WAVE, and automating them leveraging AXE & PA11Y.
- Manually tested RESTful API endpoints leveraging POSTMAN, Swagger & ReadyAPI and then automated them leveraging Java and RestAssured.
- Hands-on creating pull requests leveraging Git, GitHub, and Unix/Linux basic commands to accomplish daily automation tasks.

EDUCATION

National University, Gazipur, Dhaka, Bangladesh **2006 - 2007**
Master of Science, Chemistry
•**GPA:** 3.05

National University, Gazipur, Dhaka, Bangladesh **2002 - 2006**
Bachelor of Science, Chemistry
•**GPA:** 2.91

TRAINING & CERTIFICATIONS

•**AWS solution architect associate**
•**DHS Trusted Tester Program certification (v.5)**
•**Professional Scrum Master™ I (PSM I)**: Scrum.org
•**CompTIA Security+ ce Certification**
•**ASTQB - ISTQB: Foundation Level software testing (CTFL)**
•**ASTQB - ISTQB: Certified Tester AI Testing**
•**ASTQB - ISTQB: Advanced Level Test Manager (CTAL-TM)**
•**ASTQB - ISTQB: Advanced Test Automation Engineer (CTAL-TAE)**
•**ASTQB - ISTQB: Certified Tester, Advanced Level Test Manager**
•**Test Architect for Tricentis Tosca (AS1, AS2, API Test, TDS1)**
•**The Complete Cyber Security Course (Network Security)**: StationX
•**Certified SAFe® 4 Agilist**: Scaled Agile Inc
•**Certified SAFe® DevOps (6.0)**: Scaled Agile Inc
•**ACCELQ Automation Engineer**: May 2025

VOLUNTEER/COMMUNITY SERVICE EXPERIENCE

New York City Police Department **Sep 2019 - Sep 2023**
Auxiliary NYPD
•Patrol housing developments, residential, and commercial areas
•Patrol subway entrances and stations
•Maintain order at parades, festivals, street fairs, and other special events
•Patrol houses of worship
•Assist in crime prevention activities
•Perform traffic control at motor vehicle accidents and fire scenes
•Perform various other non-enforcement duties

HONORS & AWARDS

•**Spot Award - Raytheon Technologies (RTX)** - March 2020: You are being recognized for: Innovation
